Minimal and Simplistic

Roberto Silva Landscape and Garden design is a studio based in North London specialising in designing, developing and restoring gardens.

One of his main design trademarks is the use of clean lines throughout his projects without too much ornamentation.

"I like to work with long lines. It's a simple idea, but the line can become lots of different things. It may become a seat, or it could turn into a flight of steps. The line could be anything from the edge of a lawn to a long, low wall."

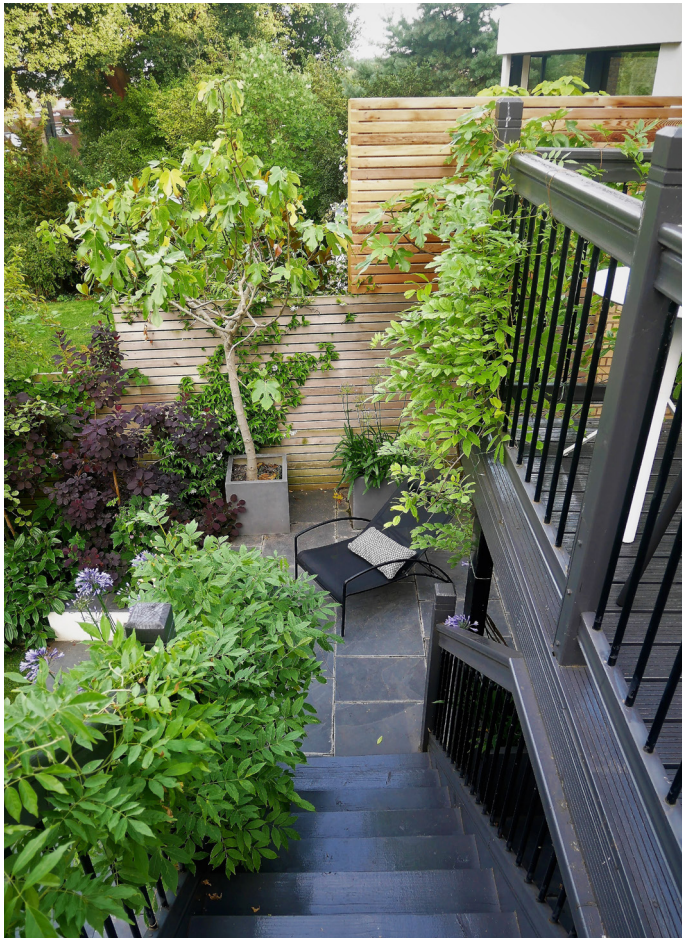

His materials are on beige and grey and complemented with subtle lighting.

One of Roberto's trademarks is large, bold, architectural plants with interesting textures mixed with clean, stylish materials.

Roberto Silva has great influence on minimalist and simplicity of the design taking thought out small or large projects.

Garden Styling

Styling the garden is also another important aspect of Silva designs. He always uses materials that resonate with the space whenever possible.

Japanese Influence

Japanese Garden Design is a great influence in Silva Gardens. In this large garden he used a lot of materials from around the world.

Planting Schemes

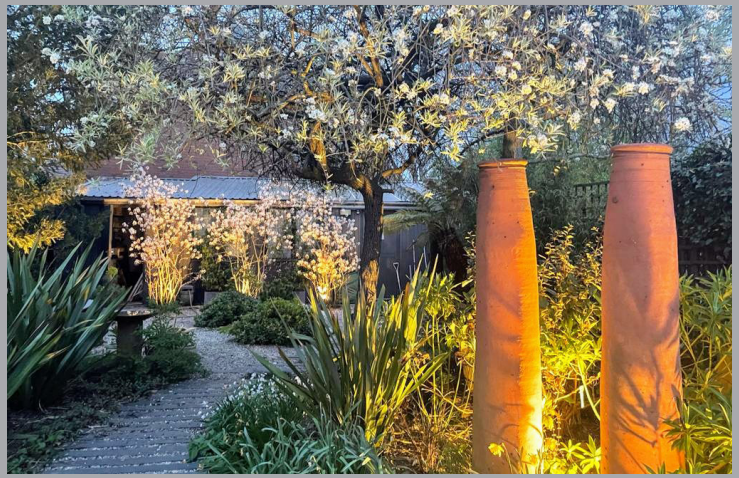

Planting is in the heart of Silva design in modern or traditional settings

Sculptural Elements

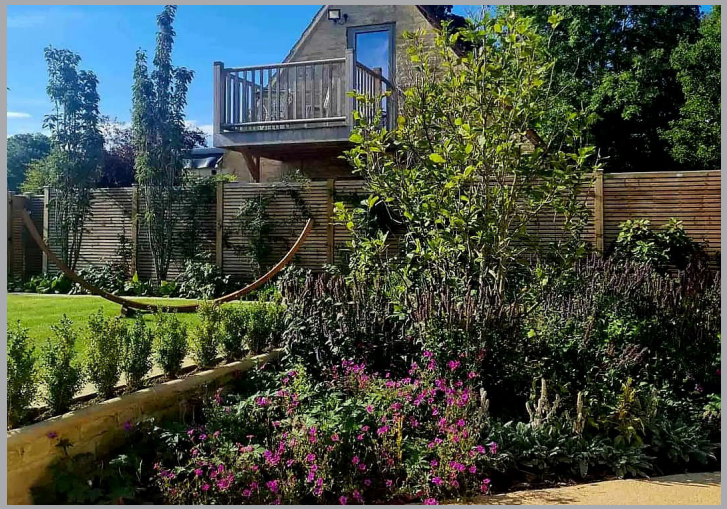

The placement of sculptural elements are a very important aspect of his design as these focal points add an extra layer of interest in the garden.

ROBERTO SILVA
LANDSCAPE & GARDEN DESIGN

Roberto Silva Landscape and Garden Design is an award-winning studio based in North London, but working in other parts of the capital and further afield.

His work is always defined by a strong concept, cross fertilizing ideas from art, architecture and other media as seen in this brochure, his website and in many mainstream magazines and books such as Gardens' Illustrated, The English Garden, and The Sunday and Financial Times.

He specializes in contemporary designs, creating a unique and artful gardens. "Our main aim is to focus on our clients satisfaction, listening to your needs and requirements and create an outdoor space designed to fit your lifestyle."
